INTEGRATION CATEGORIES
READ

- 1 Momentum**
Is execution converging on the plan? Signed -10 to +10, read daily.
- 2 Confidence**
Is the signal strong enough to trust the reading yet?
- 3 Needs attention**
Drift, anomalies, and capacity risk, flagged the day patterns shift.
- 4 Insight and signals**
Plain language on what is driving acceleration or friction.

DELIVERED IN

The chat platform your team already monitors — no new app to learn.

READS FROM

Collaboration, project management, and development tools your teams already use. Message content is never stored.

RUNS ON

Fully hosted SaaS. Team-level analytics only, with tenant isolation at every layer.
